Subject Index of Papers Published in Volume 84 of the *Journal of Dairy Science*[1]

A

absorption of nucleosides, brush border membrane, Na^+-dependent nucleoside transport, digestion of nucleic acids, 614
absorption, methionine, ruminally protected amino acid, 194
accessory sperm, embryo quality, dairy cattle, artificial insemination, 2413
acid milk gel, ultrasonic measurement, shear wave, dynamic rheology, 375
acidification activity, frozen storage, fatty acid composition, lactic acid bacteria, 2347
adhesion molecule, major histocompatability complex, leukocyte, energy balance, 421
adjunct culture, proteolysis, sensory evaluation, reduced fat cheese, 2117
aerobic stability, *Lactobacillus buchneri*, barley, silage, 1149
aflatoxin B_1, lactobacilli, bifidobacteria, lactococci, 2152
agent, extension, education, audience, E191
aggregation, colonization, *Lactobacillus*, probiotic, 1001
aggression, dairy cow, parity, mixing, 2424
airspace, milk yield, milk quality, sheep, 2632
alfalfa silage, bromegrass silage concentrate, bacterial N, dairy cattle, 1156
  milk quality, clostridial spore, cheese quality, 2494
  red clover silage, nonprotein N, 1728
alfalfa, ^{15}N isotope, metabolism, rumen, 2738
  grazing, pluronic detergent, bloat, 167
alfalfa-hay, stage of lactation, methionine, breed, 917
α-lactoalbumin, polymorphism, lactose synthase, bovine, 1542
amendment, ammonia volatilization, dairy manure, phosphorus, 1814
amino acid, dairy cow, modeling, protein, 649, 665
  goats, milk, insulin, 241
  soybean meal, fish meal, 1174
  urea, recycling, E223
amino acid catabolism, tyrosine, phenylalanine, *Lactobacillus*, 1011
amino acid imbalance, arterial infusion, milk composition, 1192
ammonia volatilization, dairy manure, phosphorus, amendment, 1814
amoxicillin, residue, calf, penicillin, 126
analysis time, lactation stage, ewe milk, lactoperoxidase system, 1829
analytical testing methods, carbon dioxide, milk, 1959
animal breeding, research and education, career contribution, E24
animal health, mastitis, reproduction, somatotropin, 1098
animal model, nonreturn, fertility, mating bull, 1238
anisotropic chemical shift, calcium phosphate, casein micelle, ^{31}P solid-state nuclear magnetic resonance, 1310
anthranilic acid, Cheddar cheese flavor, tryptophan catabolite, 1773
antibiotic residue testing, colostrum, transition milk, immunoglobulin, 100
antibiotic resistance, bacterial pathogen, mobile DNA element, E151
antibiotics, reproductive performance, financial analysis, toxic puerperal metritis, 2010
antimicrobial resistance, leukocyte, *Staphylococcus aureus*, plasmid, 2641
antioxidant, whey, protein hydrolysate, lipid protein, 2577
aroma compound, microorganism, cheese, gas chromatography, 2125
arterial infusion, milk composition, amino acid imbalance, 1192
artificial insemination, accessory sperm, embryo quality, dairy cattle, 2413
  generation interval, progeny testing, sire sampling, 1899
ascorbic acid, dairy cattle, somatic cell count, metabolic profile, 134
  oxidized flavor, vitamin C, 2302
ATPase, protease, heat shock, ClpX, 1783
audience, agent, extension, education, E191

B

bacterial N, dairy cattle, alfalfa silage, bromegrass silage concentrate, 1156

[1]Page numbers preceded by E refer to the Electronic Supplement of Volume 84 of JDS, containing papers from the 1999 Joint ADSA/ASAS meeting in Baltimore, Maryland.

bacterial pathogen, mobile DNA element, antibiotic resistance, E151
barley, silage, aerobic stability, *Lactobacillus buchneri*, 1149
barley and corn grain, ruminal fermentation, dairy cow performance, 2760
Bayesian analysis, categorical trait, genetic parameter estimation, 694
Baysian method, clinical mastitis, heritability, threshold model, 2337
behavior, dairy cattle, genetics, temperament, E31
digestion, milk yield, steam-rolled corn, 453
feed intake, eating, dairy cow, E156
feeding frequency, dairy cow, food offering, 1979
immune response, sheep, solar radiation, 629
tail-docking, cattle, fly avoidance, 1822
bifidobacteria, colon, lipid peroxide, iron, 1583
lactococci, aflatoxin B_1, lactobacilli, 2152
probiotic, functional cheese, Canestrato Pugliese cheese, 551
biofilm, nonstarter lactic acid bacteria, cheese, calcium lactate crystal, 1926
bioluminescence, milking sanitation, 818
biosecurity, culling, dairy, herd-expansion, 955
biotech crops, livestock performance, genetically enhanced crops, E9
biotin, milk production, dairy cow, 498
survival analysis, white line separation, dairy cow lameness, 1969
birth date, calving date, record accuracy, 2089
bloat, alfalfa, grazing, pluronic detergent, 167
blood flow, uterine artery, dairy cow, transit-time ultrasonic flow probe, 1621
blood metabolite, dry cow, energy level, 2240
body condition score, energy balance, fertility, 1508
, heritability, genetic correlation, 1265
genetic selection, fertility, dairy cow, 2327
heart girth, parameter, dairy cattle, 2321
heritability, production, reproduction, 266
reproduction, ketosis, repeated measure analysis, 1390
body weight change, monitoring, dairy cattle, energy balance prediction, 471
bone, phosphorus, dairy cow, reproduction, 1738
bovine, α-lactoalbumin, polymorphism, lactose synthase, 1542
mammary, epithelia, ion transport, 2622
neutrophil, immunomodulator, whey, 824
urea, oocyte maturation, in vitro embryo production, 1800
bovine mastitis, premilking teat disinfectant, phenolic combination, environmental mastitis pathogen, 1545
bovine milk, sialoglycoconjugate, newborn defense, lactation, 995
bovine MUC1, milk fat globule membrane, complete amino acid sequence, carbohydrate composition, 2591
bovine somatotropin, lactating cow, timed artificial insemination, presynchronization, 1646
breed, alfalfa-hay, stage of lactation, methionine, 917
breeding, mathematical programming, Jersey, multiple objective, 2782
breeding value, multitrait, meta-analysis, selection index, E47
breed-specific single nucleotide polymorphism, insertion, pigmentation, MC1-R, 1768
Brevibacterium linens, carotenoid, spectrocolorimetry, color, 354
broiler litter, growth, protein, heifer, 299
bromegrass silage concentrate, bacterial N, dairy cattle, alfalfa silage, 1156
bromodeoxyuridine, cell renewal, lactation curve, somatotropin, 2177
brown midrib corn silage, digestion, rumen, intestine, 2469
energy balance, 885
brush border membrane, Na^+-dependent nucleoside transport, digestion of nucleic acids, absorption of nucleosides, 614
brush control, weed utilization, goat, weed control, E170
buffer, rumen digestion, lactating cow performance, forage inclusion, 1707
bulk milk tank, foodborne pathogen, 2157
Petrifilm aerobic count, total bacterial count, 292
bulk tank milk, *Pseudomonas fluorescens*, genotype, phenotype, 1421
bulk tank somatic cell count, health regulation, 370
butter fat, polymorphism, X-ray diffraction, differential scanning calorimetry, 756
butter, fish oil, conjugated linoleic acid, milk, 345

C

calcium, dairy calf, dietary cation-anion difference, 147
calcium lactate crystal, biofilm, nonstarter lactic acid bacteria, cheese, 1926
calcium phosphate, casein micelle, ^{31} solid-state nuclear magnetic resonance, anisotropic chemical shift, 1310
calcium status, osteocalcin, milk fever, hypocalcemia, 1749
calf, stress, transportation, heifer, E19
California mastitis test, intramammary infection, calving, somatic cell count, 2018
calf, colostrum, immunoglobulin G, colostrum supplements, 2059
energy, protein, growth, 830
penicillin, amoxicillin, residue, 126
calving date, record accuracy, birth date, 2089

calving ease score, fertility, nonreturn rate, somatic cell score, 2543
calving interval, lactation length, milk production, reproductive management, 600
calving, somatic cell count, California mastitis test, intramammary infection, 2018
Canestrato Pugliese cheese, bifidobacteria, probiotic, functional cheese, 551
canola seed, milk fatty acids, dairy cow, desaturase, 1375
caprine casein, oxygen-17 nuclear magnetic resonance, water binding, rennin coagulation, E93
capsule, freezing, survival, β-galactosidase, 1367
carbohydrate, nonfiber carbohydrate, microbial protein, fermentation, 2486
carbohydrate composition, bovine MUC1, milk fat globule membrane, complete amino acid sequence, 2591
carbon dioxide, milk, analytical testing methods, 1959
carbonation, yogurt, culture, pH, 543
career contribution, animal breeding, research and education, E24
carotenoid, spectrocolorimetry, color, *Brevibacterium linens*, 354
α_{s1}-casein, cheese ripening, proteolysis, milk-clotting enzyme, 1335
α_{s2}-casein, Fourier Transform infrared, circular dichroism, secondary structure, 1944
β-casein, grana cheese, proteolysis, ripening, 60
casein, chitosan, hydrocolloid, casein-chitosan complex, 361
  gastric digestion, colostrum, mature milk, 1851
  rennet, gelation, mineral, 1569
casein-chitosan complex, casein, chitosan, hydrocolloid, 361
casein haplotypes, milk production, linkage disequilibrium, dairy cattle, 507
casein micelle, microfiltration, nuclear magnetic resonance, 2357
  ^{31} solid-state nuclear magnetic resonance, anisotropic chemical shift, calcium phosphate, 1310
categorical trait, genetic parameter estimation, Bayesian analysis, 694
cattle, color, wavelength, perception, 807
  fly avoidance, behavior, tail-docking, 1822
  microbiology, drinking, water, 1856
  quantitative trait loci, marker map, milk production, 1516
  tail docking, cleanliness, mastitis, 84
cell, rumen epithelium, technique, heifer, 183
cell release, coated, immobilized, 1118
cell renewal, lactation curve, somatotropin, bromodeoxyuridine, 2177
cellulose, digestion kinetics, microbial adhesion, ruminal pH, 848
Cheddar cheese, ripening, nonstarter lactobacilli, proteolysis, 50
Cheddar cheese flavor, tryptophan catabolite, anthranilic acid, 1773
Cheddar enzyme-modified cheese, glycolysis, lipolysis, 66
cheese, calcium lactate crystal, biofilm, nonstarter lactic acid bacteria, 1926
  gas chromatography, aroma compound, microorganism, 2125
  lamb chymosin, coagulant, 1020
  meltability, 1937
  opacity, salt, storage, 2364
cheese quality, alfalfa silage, milk quality, clostridial spore, 2494
cheese ripening, proteolysis, milk-clotting enzyme, α_{s1}-casein, 1335
cheese yield, reduced-fat Cheddar, rennet coagulation time, moisture, 1027
chewing activity, particle size distribution, dairy cow, feed particle size, 2709
chitosan, hydrocolloid, casein-chitosan complex, casein, 361
chocolate, milk fat, flavor, ice cream, 21
cholesterol, proteolysis, milk, *Tetrahymena*, 2136
chromium, dairy steer, lipid metabolism, volatile fatty acids, 1679
chromium, glucose tolerance test, metabolic parameter, periparturient dairy cow, 1218
circular dichroism, secondary structure, α_{s2}-casein, Fourier Transform infrared, 1944
claw lesion, hock lesion, lameness, free-stall design, 2686
cleanliness, mastitis, cattle, tail docking, 84
clinical mastitis, heritability, threshold model, Baysian method, 2337
  teat condition, teat-end callosity, 2664
close up, transition, protein, dry cow, 2273
clostridial spore, cheese quality, alfalfa silage, milk quality, 2494
clover, milk production, pasture, grass, 1166
ClpX, ATPase, protease, heat shock, 1783
coagulant, cheese, lamb chymosin, 1020
coagulase-negative staphylococci, somatic cell count, ovine mastitis, 572
coagulation property, goat milk, plasminogen activation system, 1786
coated, immobilized, cell release, 1118
coliform, mastitis, dry cow therapy, 1632
colon, lipid peroxide, iron, bifidobacteria, 1583
colonization, *Lactobacillus*, probiotic, aggregation, 1001
color, *Brevibacterium linens*, carotenoid, spectrocolorimetry, 354

wavelength, perception, cattle, 807
colostral immunoglobulin, placental retention, dairy cow, colostrum, 389
colostrum, colostral immunoglobulin, placental retention, dairy cow, 389
immunoglobulin G, colostrum supplements, calf, 2059
mature milk, casein, gastric digestion, 1851
specific gravity, immunoglobulin, 937
transition milk, immunoglobulin, antibiotic residue testing, 100
colostrum supplements, calf, colostrum, immunoglobulin G, 2059
comparison of methods, lipase activity, p-nitrophenol, validation, 1590
complete amino acid sequence, carbohydrate composition, bovine MUC1, milk fat globule membrane, 2591
composition, seasonal, goat milk, E79
temperature interrelationship, dietary fat, yield, 2680
compositional effect, nucleation, milk fat, crystallization, 2392
computer simulation, pasture intake, dairy cow, 860
concentrate, late gestation, dairy cow, subsequent lactation, 1468
rumen pH, milk production, corn silage, 2721, 2730
confectionery coating, crystallization, milk fat, palm kernal oil, 332
conformation, goat, genetic evaluation, milk yield, E69
conformation trait, milk production trait, quantitative trait loci, microsatellite marker, 2535
conjugated linoleic acid, milk, butter, fish oil, 345
fat supplement, milk fat, plant oil, 680
milk, fish oil, 1607
n-3 fatty acids, soybean meal, fish meal, 1845
pasture, fatty acid, 2295
copper, liver, milk fatty acid, serum cholesterol, 2308
roasted soybean, milk fatty acids, spontaneous oxidized flavor, 2440
corn, grazing, milk production, pasture, 2227
hybrid, nutrient composition, milk production, 442
corn gluten feed, dairy cow, forage and concentrate replacement, wet corn milling, 873
corn processing, starch digestion, fiber digestion, rumen, 1458
corn silage, concentrate, rumen pH, milk production, 2721
transgenic corn, milk production, milk composition, 1863
type and level of fat, rumen fermentation, milk fat, 2751
corn silage hybrid, dry matter yield, digestibility, milk yield, 2217
Cornell Net Carbohydrate and Protein System, monensin, nitrogen, dairy cow, 1717
Corynebacterium, phylogeny, *Corynebacterium bovis*, 2419
cost of production, efficiency, small dairy farm, 2573
cottonseed, starch, urea, ruminal fermentation, 154
cottonseed meal, dairy cow, gossypol, whole cottonseed, 2231
covariance component, multivariate analysis, Gibbs sampling, structural model, 1525
cow, dairy, organic, disease, 2673
milk fever, hypocalcemia, Naloxone, 1627
milk yield, temperature, light, 2314
crude protein, neutral detergent fiber, milk urea nitrogen, urinary N excretion, 2284
transition cow, milk production, 213
crystallization, compositional effect, nucleation, milk fat, 2392
milk fat, palm kernal oil, confectionery coating, 332
culling, dairy, herd-expansion, biosecurity, 955
culture, pH, carbonation, yogurt, 543
cysteine, hydrolyzed feather meal, meat and bone meal, methionine, 2515
cystic ovarian disease, dairy cattle, genetic parameters, 286
cytokine, thyroxine-5'-triidothyronine, energy balance, somatotropin, 2430
cytokine, *Staphylococcus aureus* mastitis, neutrophil, lymphocyte subset, 1077
cytoplasmic effect, pedigree error, variance component, maternal lineage, 944

D

daily somatic cell count, random regression, genetic parameters, 1255
dairy, herd-expansion, biosecurity, culling, 955
organic, disease, cow, 2673
starch, grain processing, ruminant, 429
dairy calf, dietary cation-anion difference, calcium, 147
dairy cattle, alfalfa silage, bromegrass silage concentrate, bacterial N, 1156
artificial insemination, accessory sperm, embryo quality, 2413
body condition score, heart girth, parameter, 2321
casein haplotypes, milk production, linkage disequilibrium, 507
early conception factor, pregnancy diagnosis, 1884
energy balance prediction, body weight change, monitoring, 471
genetic parameters, cystic ovarian disease, 286
genetics, temperament, behavior, E31
grazing, Ovsynch, timed artificial insemination, 2700
ionophore, lasalocid, monensin, E194

iterative methods, parallel computing, test-day model, 276
lactation curve, decision-support system, machine learning, 730
locomotion, floor, friction, 623
mastitis, reproduction, 1407
milk production, management, reproduction, E128
Mycobacterium paratuberculosis, Johne's disease, milk production, 2188
pedigree error, genetic evaluation, international comparison, 2523
research, future, E62
survival, genetics, fertility, E56
somatic cell count, metabolic profile, ascorbic acid, 134
survival analysis, length of productive life, genetic evaluation, 2073
dairy cow, biotin, milk production, 498
body condition score, genetic selection, fertility, 2327
behavior, feed intake, eating, E156
colostrum, colostral immunoglobulin, placental retention, 389
computer simulation, pasture intake, 860
Cornell Net Carbohydrate and Protein System, monensin, nitrogen, 1717
Dairy Herd Improvement, milk urea, 107
desaturase, canola seed, milk fatty acids, 1375
dietary protein, reproduction, energy metabolite, 908
energy balance, progesterone, repeated measure, 1060
feed particle size, chewing activity, particle size distribution, 2709
fertility, survival analysis, milk urea nitrogen, 482
food offering, behavior, feeding frequency, 1979
forage and concentrate replacement, wet corn milling, corn gluten feed, 873
gossypol, whole cottonseed, cottonseed meal, 2231
grain processing, effective fiber, digestibility, 2203
growth hormone receptor, liver, lactation, E113
health, fertility, monensin, 1085
hypocalcemia, synthetic zeolite A, zinc oxide, 609
income-over-feed cost, pasture supplementation, 2460
rumination, fat, 1182
intersucking, risk factor, development of behavior, 140
lactation, rumen undegradable protein, soluble carbohydrate, 1686
logistic regression, disease, milk yield, 2025
mastitis, treatment, sensitivity, 2036
milk, pasture, dietary protein, 896
milk acetone, infrared spectroscopy, subclinical ketosis, 575
modeling, protein, amino acid, 649, 665
NutriDense corn, waxy corn, digestibility, 1698
nutrient partitioning, stage of lactation, milk yield, 233
parity, mixing, aggression, 2424
reproduction, bone, phosphorus, 1738
ovary, lactation, 1277
rumen, gas analysis, mass spectrometry, 1438
rumen acid load, in vitro technique, subacute ruminal acidosis, 1109
rumen-protected methionine, intestinal availability, 1480
selenium, sulfur, mineral, 225
subsequent lactation, concentrate, late gestation, 1468
transit-time ultrasonic flow probe, blood flow, uterine artery, 1621
wet corn gluten feed, 2478
dairy cow lameness, biotin, survival analysis, white line separation, 1969
dairy cow performance, barley and corn grain, ruminal fermentation, 2760
dairy farm, nutrient management, survey, 966
dairy farm net return, variance decomposition, Gini income inequality, 411
dairy food, graduate, industry, education, E187
students, education, E189
dairy food safety, extended shelf life product, microfiltration, *Mycobacterium paratuberculosis*, 1
dairy goat, dairy sheep, goat milk, sheep milk, 2097
dairy heifer, lactation, stair-step compensatory nutrition, 1669
Dairy Herd Improvement, milk urea, dairy cow, 107
dairy herd, milk urea testing, Ontario, 1397
dairy manure, phosphorus, amendment, ammonia volatilization, 1814
dairy policy, federal order reform, farm bill, 974
dairy sheep, goat milk, sheep milk, dairy goats, 2097
weaning, East Friesian, 1660
dairy sire, individual animal performance record, international genetic evaluation, 2789
dairy steer, lipid metabolism, volatile fatty acids, chromium, 1679
daughter information, international comparison, weighting factor, simulation, 1759
decision-support system, machine learning, dairy cattle, lactation curve, 730
desaturase, canola seed, milk fatty acids, dairy cow, 1375
detection, ketone bodies, Ketolac, subclinical ketosis, 583
development of behavior, dairy cow, intersucking, risk factor, 140
diagnosis, mastitis, multiplex, polymerase chain reaction, 1140

dietary cation-anion difference, calcium, dairy calf, 147
dietary fat, yield, composition, temperature interrelationship, 2680
dietary protein, dairy cow, milk, pasture, 896
reproduction, energy metabolite, dairy cow, 908
differential inflammatory cell count, polymorphonuclear leukocyte, mononuclear leukocyte, 1413
differential scanning calorimetry, butter fat, polymorphism, X-ray diffraction, 756
X-ray diffraction, triacylglycerol, polymorphism, 2402
digestibility, dairy cow, grain processing, effective fiber, 2203
milk yield, corn silage hybrid, dry matter yield, 2217
pH, pasture, rumen, 1449
dairy cow, NutriDense corn, waxy corn, 1698
digestion, milk yield, steam-rolled corn, behavior, 453
rumen, intestine, brown midrib corn silage, 2469
digestion kinetics, microbial adhesion, ruminal pH, cellulose, 848
digestion of nucleic acids, absorption of nucleosides, brush border membrane, Na^+-dependent nucleoside transport, 614
discrete Markov process, risk management, forecasting, 1805
disease, cow, dairy, organic, 2673
disease, milk yield, dairy cow, logistic regression, 2025
lameness, milk production, 1988
diurnal variation, pasture, rumen pH, microbial protein synthesis, 2066
dominant follicle, follicular dynamics, superovulation, follicle-stimulating hormone-P, 88
drinking, water, cattle, microbiology, 1856
dry cow, close up, transition, protein, 2273
energy level, blood metabolite, 2240
nutrition, late gestation, 115
dry cow therapy, coliform, mastitis, 1632
dry matter yield, digestibility, milk yield, corn silage hybrid, 2217
dynamic rheology, acid milk gel, ultrasonic measurement, shear wave, 375

E

early conception factor, pregnancy diagnosis, dairy cattle, 1884
early lactation, energy balance, Holstein, Jersey, 1201
forage neutral detergent fiber, yeast culture, 204
early lactation, rumen-undegradable protein, grazing cow, 1597
East Friesian, dairy sheep, weaning, 1660
eating, dairy cow, behavior, feed intake, E156
economics, grazing, model, supplementation, 2560
management, mathematical programming, heifer, 1836
milk production, E212
urea, nutrition, production, 1128
education, audience, agent, extension, E191
dairy food, graduate, industry, E187
students, E189
educational method, management, survey, E120
effective fiber, digestibility, dairy cow, grain processing, 2203
efficiency, small dairy farm, cost of production, 2573
survey, expansion, milking system, 1890
electronic activity tag, heatmount sensor, estrus detection, 792
embryo quality, dairy cattle, artificial insemination, accessory sperm, 2413
embryonic survival, stage of estrus cycle, timed insemination, ovulation synchronization, 1051
energy, protein, growth, calf, 830
energy balance, adhesion molecule, major histocompatability complex, leukocyte, 421
brown midrib corn silage, 885
fertility, body condition score, 1508
heritability, genetic correlation, body condition score, 1265
Holstein, Jersey, early lactation, 1201
progesterone, repeated measure, dairy cow, 1060
somatotropin, cytokine, thyroxine-5'-triidothyronine, 2430
energy balance prediction, body weight change, monitoring, dairy cattle, 471
energy level, blood metabolite, dry cow, 2240
energy metabolism, goat, milk, nonforage diet, 2450
nitrogen utilization, starch, postrumen digestion, 2250
energy metabolite, dairy cow, dietary protein, reproduction, 908
environmental mastitis pathogen, bovine mastitis, premilking teat disinfectant, phenolic combination, 1545
epithelia, ion transport, bovine, mammary, 2622
estrus, heat stress, timed artificial insemination, 799
mastitis, fuzzy logic, monitoring, 400
